The Ninth China-Australia Workshop on Optimization: Theory, Methods and Applications (CAWO2019), being jointly organized by Shanghai University, Chongqing Normal University, China, Federation University Australia and Curtin University, Australia will be held in Shanghai University, Shanghai, China from 15 to 18 November 2019.

As the continuations of the CAWOs, CAWO 2019 aims to bring researchers and practitioners around the world on optimization and optimal control together to exchange ideas and approaches, to present research findings and state-of-the-art solutions, to share experience and future research development on theory, methods and applications for optimization and optimal control. The previous CAWOs were held in Shanghai (2003, 2007, 2011), Ballarat (2004, 2009, 2013), Chongqing (2015) and Perth (2017).

The topics of the workshop include all areas of optimization, optimal control and their applications and will include but not be limited to

- Nonlinear programming
- Global optimization
- Non-smooth optimization
- Stochastic programming and dynamic programming
- Multi-objective optimization
- Equilibrium problems
- Integer programming
- Combination optimization
- Optimal control
- Variational inequality
- Practical applications
